

TURTLE 301 SQUARE

TURTLE BLOCKS

TURTLE ART

LOGO

The image shows a Scratch script on the left and a red square on the right. The script starts with a 'start' block, followed by a 'repeat' block with the number '4'. Inside the repeat block are 'forward' and 'right' blocks with values '150' and '90' respectively. To the right, a red square is drawn on a light yellow background. A small red turtle icon is positioned at the bottom-left corner of the square.

How easy was that?

- Change the size of the square.
- See if you can use the repeat command to add a triangle on top of the square.

TURTLE 302 GROWING SQUARES

TURTLE BLOCKS

TURTLE ART

LOGO

The image shows a Scratch script on the left and a red growing square pattern on the right. The script starts with a 'start' block, followed by a series of 'repeat' blocks. Each 'repeat' block has the number '4' and contains 'forward' and 'right' blocks with values that increase by 50 units (50, 100, 150, 200, 250) and a constant '90' for the right turn. To the right, a red pattern of growing squares is drawn on a light yellow background. The pattern consists of a small square, followed by a larger square that shares its top side with the previous square's top side, and so on, creating a staircase effect. A small red turtle icon is positioned at the bottom-left corner of the smallest square.

- See if you can add two more squares. Continue the pattern when you increase the size of each new square.
- Try to make the pattern again going to the left.

TURTLE 303 RECTANGLE

TURTLE BLOCKS

TURTLE ART

LOGO

The code blocks are: start, repeat (2), forward (150), right (90), forward (300), right (90). The drawing shows a red rectangle with a small turtle icon at the bottom-left corner.

Did you know that the correct name for this is OBLONG.
A square and an oblong can both be called a rectangle.

- Make a bigger rectangle or a smaller rectangle.
- Change the dimensions of the rectangle.

TURTLE 304 TRIANGLE PATTERN

TURTLE BLOCKS

TURTLE ART

LOGO

The code blocks are: start, repeat (5), forward (220), right (135), forward (150), right (90), forward (150), right (60). The drawing shows a red star-like pattern with five points, each formed by two triangles meeting at a central point.

- Change the size of the triangles.
- See if you can change the angles in the triangles.
You might also need to change the number of repeats.

TURTLE 305 OCTAGON

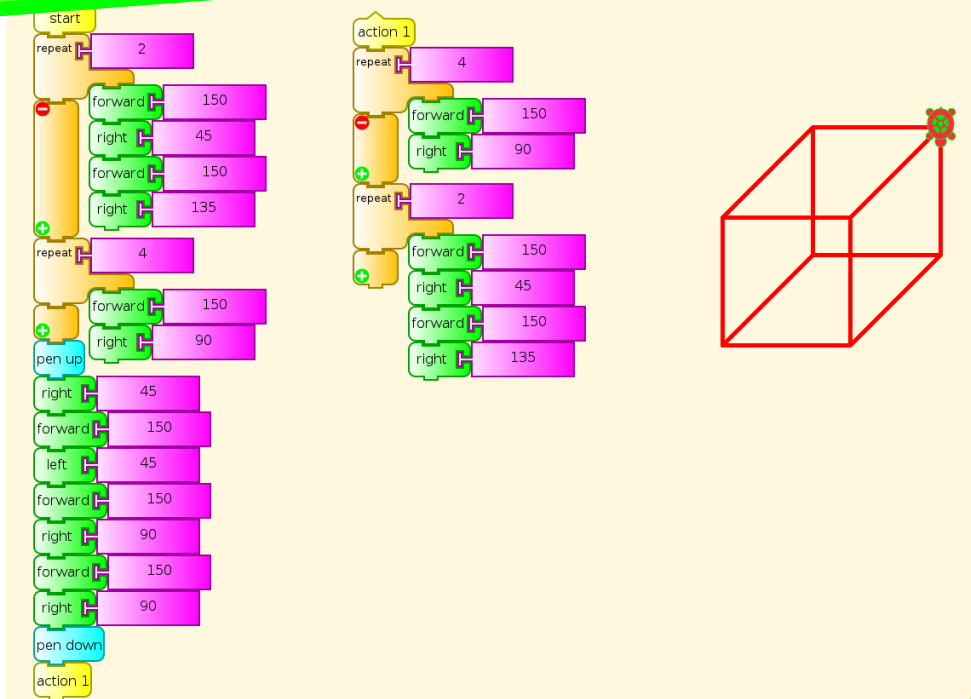

TURTLE BLOCKS

TURTLE ART

LOGO

- Change the size of the octagon.
- What happens if you change the angle by making it smaller or larger? Can you make a closed shape again?

TURTLE 306 PRISM OR CUBE

TURTLE BLOCKS

TURTLE ART

LOGO

- See if you can make another prism with an oblong face.
- Change some of the other dimensions to see what you can create.

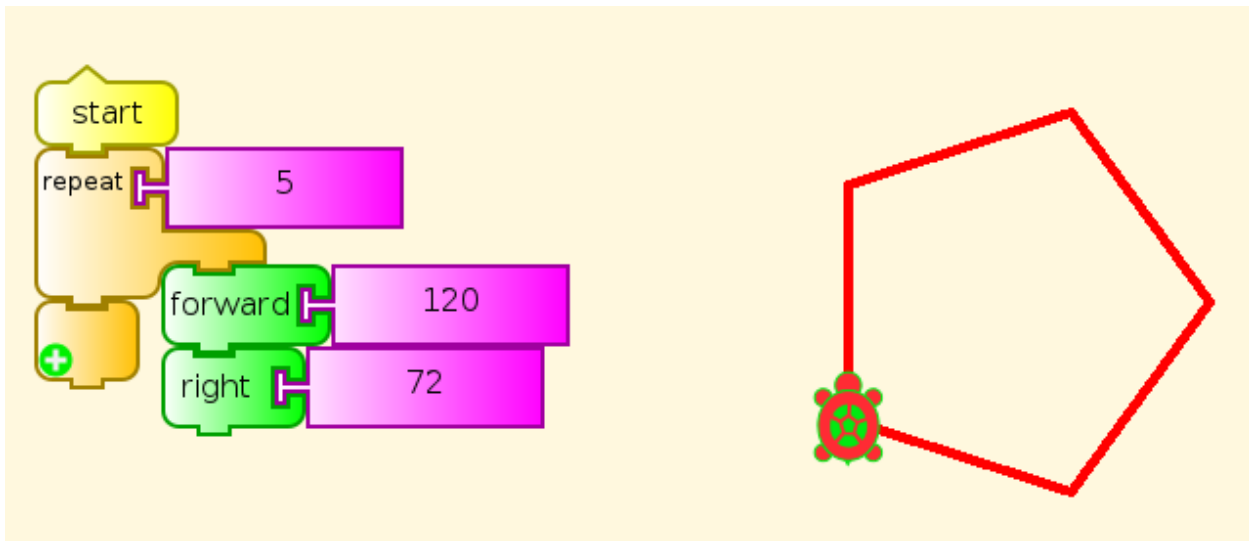

TURTLE 307 PENTAGON

TURTLE BLOCKS

TURTLE ART

LOGO

- Make a larger pentagon.
- Can you make a pentagon with a flat base line?
- What happens if you change the angle?

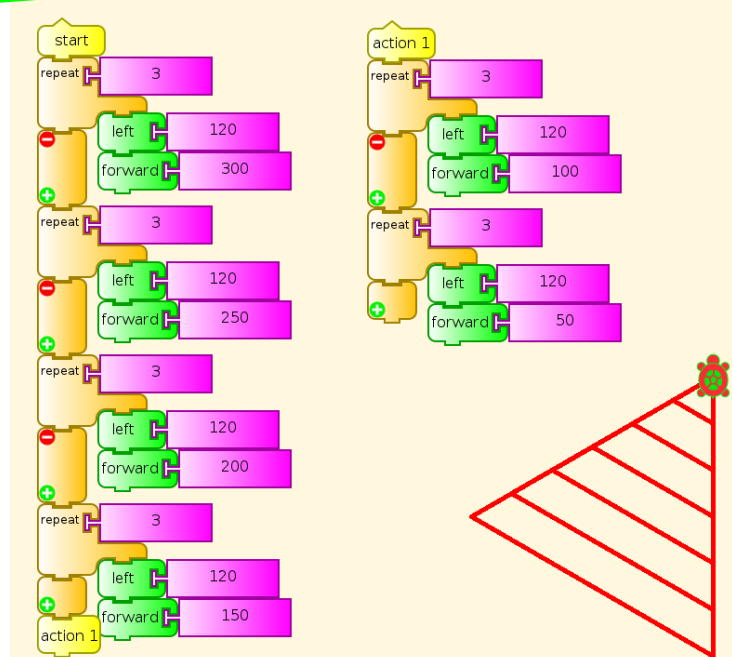

TURTLE 308 TRIANGLE PYRAMID

TURTLE BLOCKS

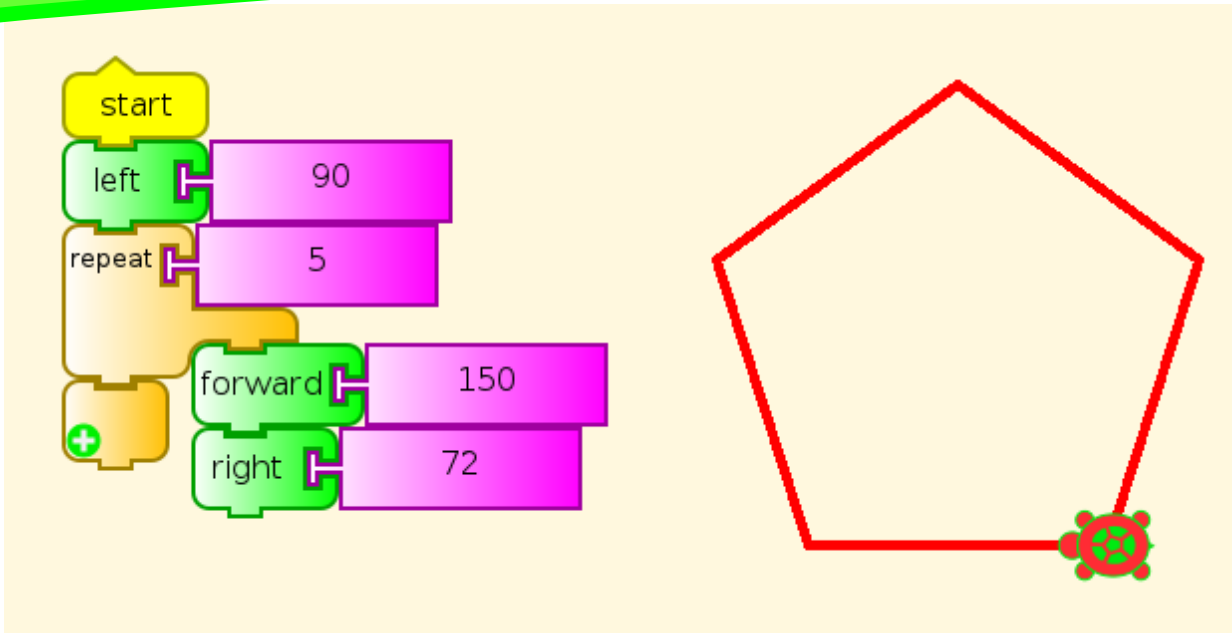

TURTLE ART

LOGO

- Can you make another pyramid like this with larger triangles?
- Can you make it so the base line is flat (not on an angle)?
- Draw a star or a flag on top of the pyramid.

TURTLE 309 PENTAGON 2

TURTLE BLOCKS

TURTLE ART

LOGO

- See if you can use the pen up and down commands to create a face inside the pentagon.
- Try to draw some legs on the pentagon.

TURTLE 310 NECKLACE

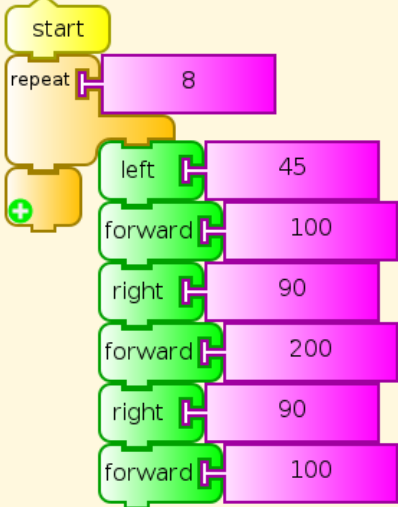

TURTLE BLOCKS

TURTLE ART

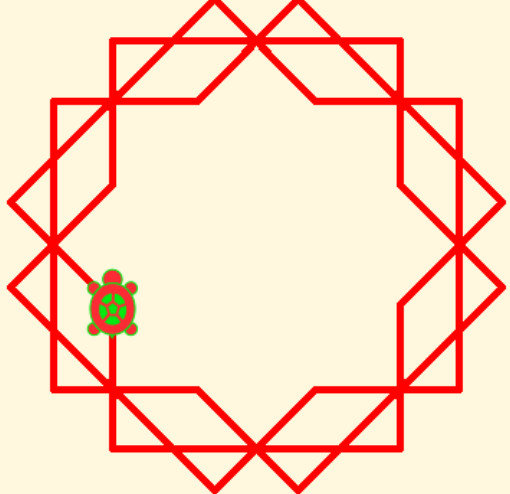

LOGO

- Create different types of necklaces.
- Can you create something special on the necklace like a cross or a star?

TURTLE 311 STAR

```
start
repeat 8
  left 45
  forward 100
  right 90
  forward 200
  right 90
  forward 100
```

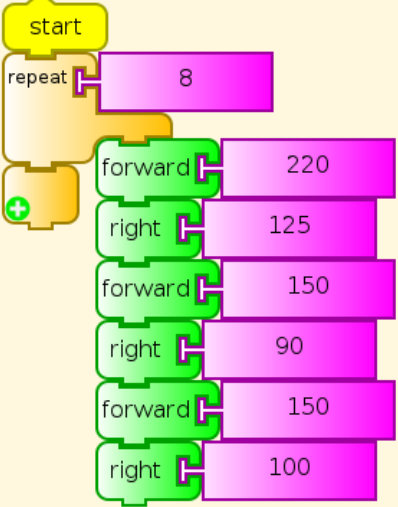

TURTLE BLOCKS

TURTLE ART

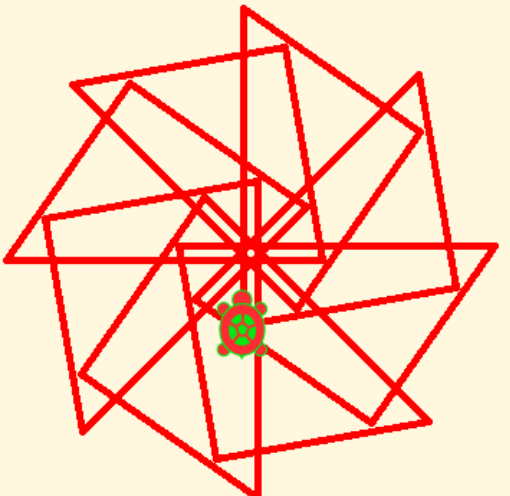

LOGO

- Make another star that is larger or smaller than this one.
- See what happens when you change some of the angles.
How many repeats do you need to complete a new star now?

TURTLE 312 WINDMILL

```
start
repeat 8
  forward 220
  right 125
  forward 150
  right 90
  forward 150
  right 100
```

TURTLE BLOCKS

TURTLE ART

LOGO

- Change some of the numbers to see what differences occur.
- Try to create a new windmill that does not have blades that touch each other.

TURTLE 313 STAR 2

The image shows a Scratch code block on the left and a red star drawing on the right. The code starts with a 'start' block, followed by a 'repeat' block with the number 9. Inside the repeat loop, there are three blocks: 'forward' with 300, and 'right' with 160. The star drawing is a red 9-pointed star with a small turtle icon at the bottom center.

TURTLE BLOCKS

TURTLE ART

LOGO

- See what happens if you make the angle higher or lower.
- Try to make other stars that are larger or smaller.
- Can you create a star with a different shape?

TURTLE 314 FENCE

The image shows a Scratch code block on the left and a red fence drawing on the right. The code starts with a 'start' block, followed by a 'repeat' block with the number 6. Inside the repeat loop, there are six blocks: 'forward' (100), 'right' (45), 'forward' (50), 'right' (90), 'forward' (50), and 'right' (45). Below the repeat loop, there are blocks for 'pen up', 'set xy' (x: 0, y: 0), 'pen down', and 'action 1'. To the right of the main code, there is an 'action 1' block containing a 'repeat' block with the number 6, followed by six blocks: 'forward' (100), 'left' (45), 'forward' (50), 'left' (90), 'forward' (50), and 'right' (180). The fence drawing is a red fence with a small turtle icon at the bottom left.

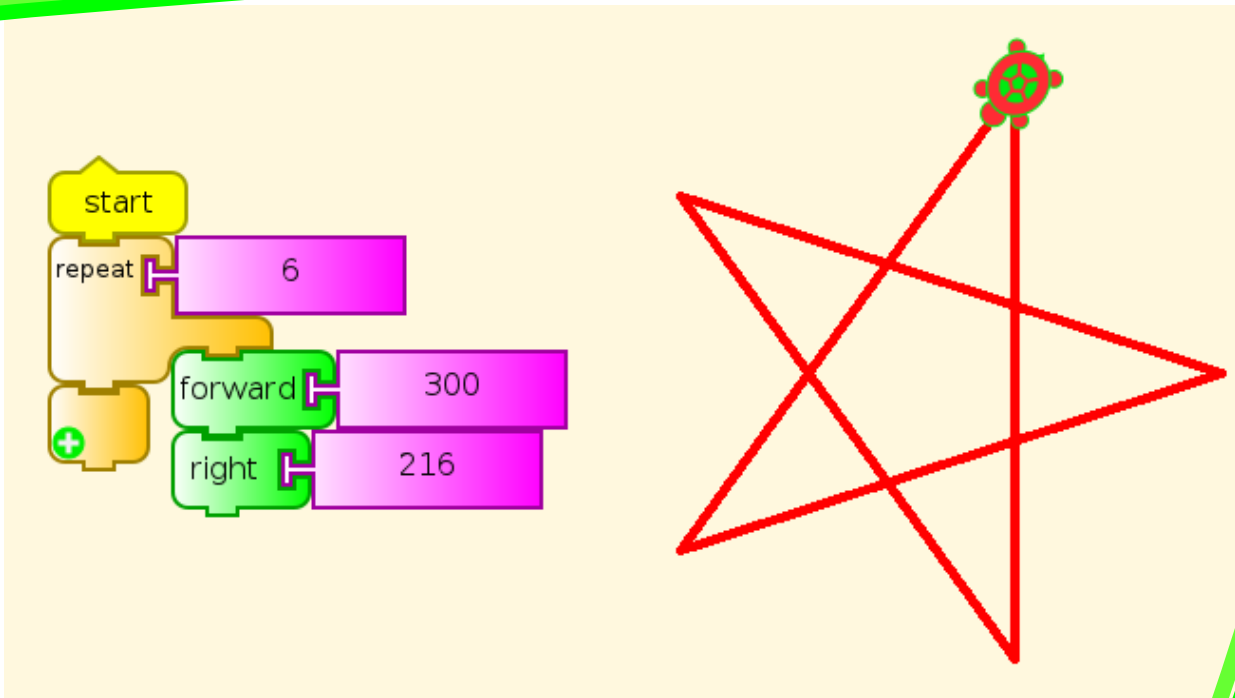

TURTLE BLOCKS

TURTLE ART

LOGO

- Try to make the fence taller.
- Can you make the fence palings wider or narrower?
- See if you can leave a gap between the two sections of fence for a gate.
- Maybe you could create a gate too!

TURTLE 315 STAR 3

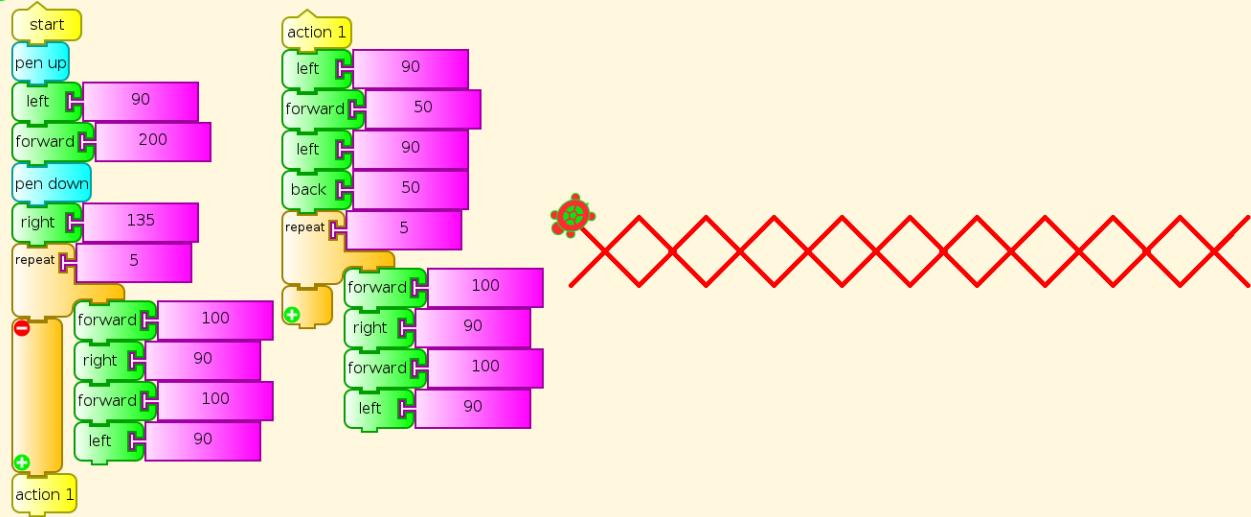

The image shows a Scratch code block on the left and a red star shape on the right. The code block starts with a 'start' block, followed by a 'repeat' block with a value of 6. Inside the repeat block, there are three blocks: 'forward' with a value of 300, and 'right' with a value of 216. The star shape is a red, five-pointed star with a small turtle icon at the top vertex.

TURTLE BLOCKS
TURTLE ART
LOGO

- Make the star smaller.
- What other type of star can you make?

TURTLE 316 SPRING

The image shows a Scratch code block on the left and a red zigzag spring shape on the right. The code block starts with a 'start' block, followed by 'pen up', 'left' (90), 'forward' (200), 'pen down', 'right' (135), and a 'repeat' block with a value of 5. Inside the repeat block, there are four blocks: 'forward' (100), 'right' (90), 'forward' (100), and 'left' (90). Below the repeat block is another 'action 1' block containing 'left' (90), 'forward' (50), 'left' (90), 'back' (50), and a 'repeat' block with a value of 5. Inside this second repeat block, there are four blocks: 'forward' (100), 'right' (90), 'forward' (100), and 'left' (90). The spring shape is a red zigzag line with a small turtle icon at the start.

TURTLE BLOCKS
TURTLE ART
LOGO

- Make the spring look like it has started to close.
- See if you can stretch the spring out.
- Can you make a spring that goes up and down instead of left to right?

TURTLE 317 STAR 5

TURTLE BLOCKS

TURTLE ART

LOGO

- What happens when you change the angle?
- Can you draw a square around the star?

TURTLE 318 DIAMONDS

TURTLE BLOCKS

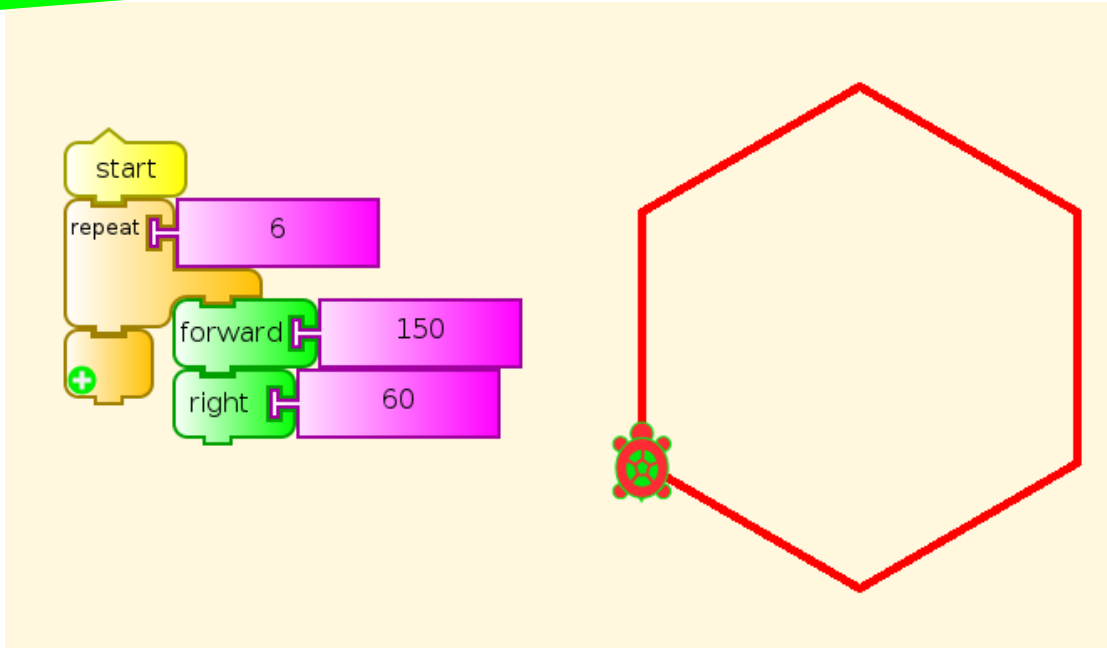

TURTLE ART

LOGO

- Try to make another row of diamonds above this row so that it creates a tessellating pattern.
- See if you can make the diamonds taller.
- Can you create a gap between each diamond?

TURTLE 319 HEXAGON

TURTLE BLOCKS

TURTLE ART

LOGO

- See if you can make a smaller hexagon inside this one. Can you do it without creating a line that joins the hexagons?
- Can you make the hexagon with a flat base?

TURTLE 320 STAR 4

TURTLE BLOCKS

TURTLE ART

LOGO

- See what else you can add to the end of each point of a star.
- Make some changes to create the figure on the right side.
- What else can you create by changing some of the numbers?

TURTLE 321 BIG PLUS

The code blocks are: start, repeat (4), left (90), forward (100), right (90), forward (200), right (90), forward (100). The drawing shows a red plus sign with a turtle icon at the center of the intersection.

TURTLE BLOCKS

TURTLE ART

LOGO

- Can you turn this plus into a cross?
- Try to make the four sides longer without making the centre any larger between the four inside points.

TURTLE 322 ZIG ZAG 2

The code blocks are: start, pen up, left (90), forward (500), pen down, right (135), repeat (6), forward (100), right (90), forward (100), left (90), action 1. The drawing shows a red zigzag pattern with a turtle icon at the start.

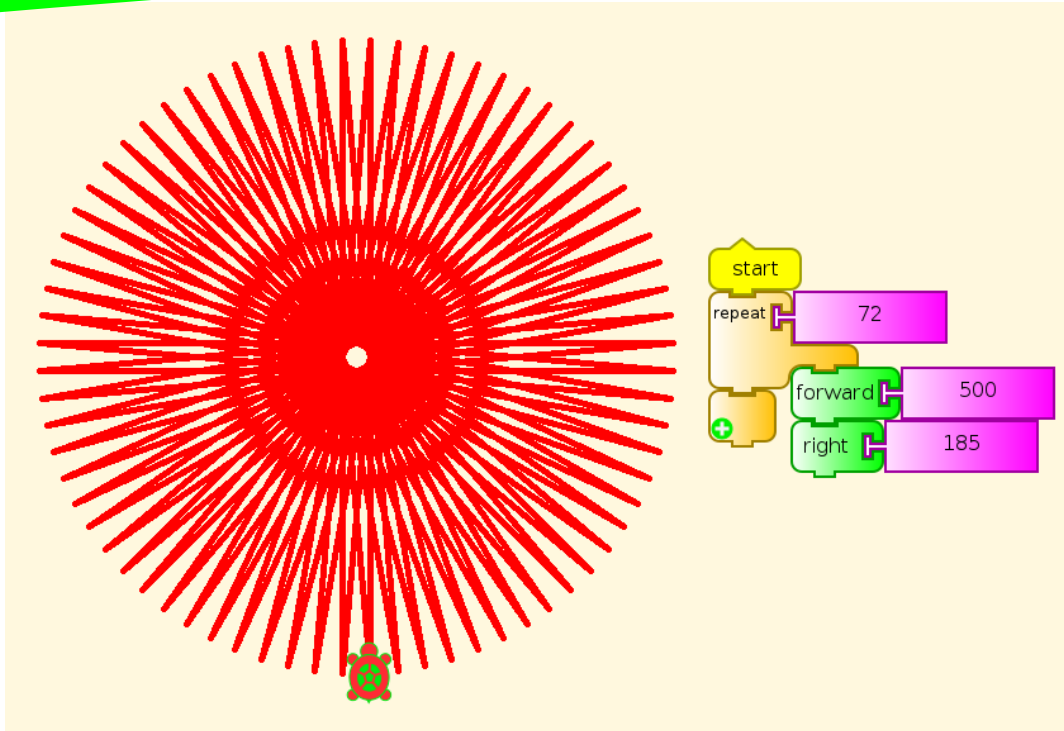

TURTLE BLOCKS

TURTLE ART

LOGO

- See if you can create some handles on the end of your zig zag.
- Maybe you can create something on the other end to make it look like the zig zag has picked up something.

TURTLE 323 SUN

```
start
repeat 72
  forward 500
  right 185
```

TURTLE BLOCKS
TURTLE ART
LOGO

- Can you change the colour (color) of the sun?
- What happens if you halve the number of repeats?
Then halve it again?

TURTLE 324 CHRISTMAS TREE

```
start
pen up
forward 200
pen down
right 135
repeat 5
  forward 100
  right 135
  forward 50
  left 135
left 45
back 50
right 90
forward 50
action 1

action 1
right 90
forward 100
right 90
forward 50
left 90
forward 50
repeat 5
  forward 50
  right 135
  forward 100
  left 135
```

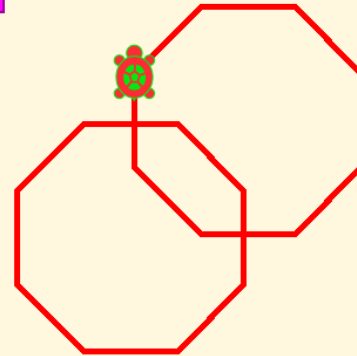

TURTLE BLOCKS
TURTLE ART
LOGO

- This tree would look good if you could put a nice star on top of it.
- Draw the tree in a large pot or box.
- Can you make the tree larger?
- Can you create some things on your tree?

TURTLE 325 TWO OCTAGONS

```
start
repeat 8
  right 45
  forward 80
pen up
forward 100
right 90
forward 100
left 90
pen down
repeat 8
  right 45
  forward 80
```

TURTLE BLOCKS
TURTLE ART
LOGO

- Can you make four octagons?
- Can you make the two pentagons so they do not touch (intersect) each other?

TURTLE 326 BLOCK PATTERN

```
start
repeat 8
  right 45
  forward 50
  right 90
  forward 50
  right 45
  forward 100
  back 100
  left 135
```

TURTLE BLOCKS
TURTLE ART
LOGO

- See what other types of block patterns you can create.
- Can you make the same pattern larger?
Can you make it just half (50%) bigger than it is now?

TURTLE 327 ANGLE PATTERN

The code blocks are:

- start
- repeat 8
- forward 150
- right 90
- forward 150
- right 135
- forward 100
- right 180

The pattern is a red geometric shape consisting of 8 identical segments, each formed by a forward movement of 150 units, a right turn of 90 degrees, another forward movement of 150 units, a right turn of 135 degrees, and a final forward movement of 100 units.

TURTLE BLOCKS

TURTLE ART

LOGO

- See if you can make this pattern with different angles.
- How many repeats do you need to have if you change the first angle (right angle) to 45 degrees?

TURTLE 328 SQUARE PATTERN

The code blocks are:

- start
- repeat 10
- right 36
- forward 100
- right 90
- forward 100
- right 90
- forward 100
- right 90
- forward 100
- right 90

The pattern is a red geometric shape consisting of 10 identical squares, each rotated 36 degrees relative to the previous one, creating a star-like pattern.

TURTLE BLOCKS

TURTLE ART

LOGO

- What other patterns can you create just using squares?
- How many repeats do you need to have if you change the first angle to 18?

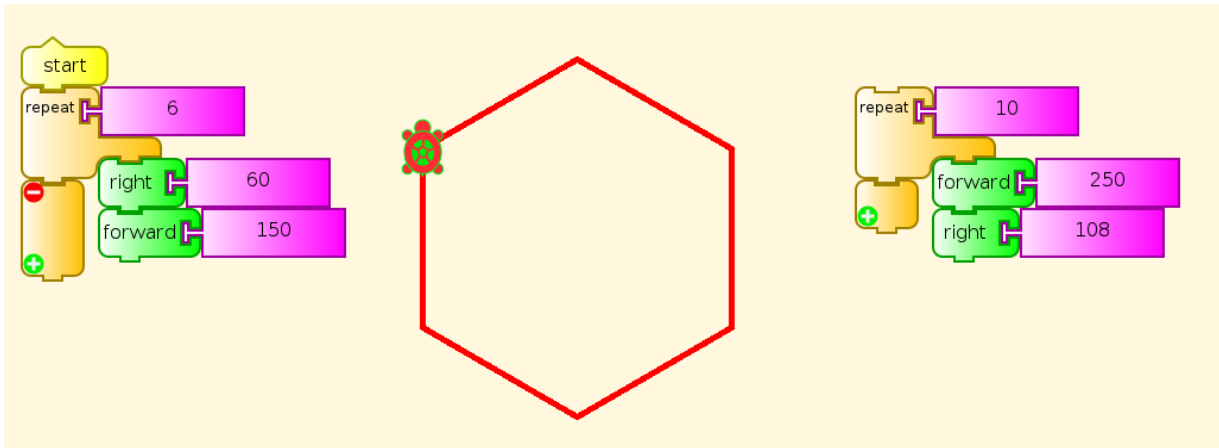

TURTLE 329 HEXAGON

TURTLE BLOCKS

TURTLE ART

LOGO

- Look how different you can make this hexagon look by changing all the numbers.
- What else can you create?

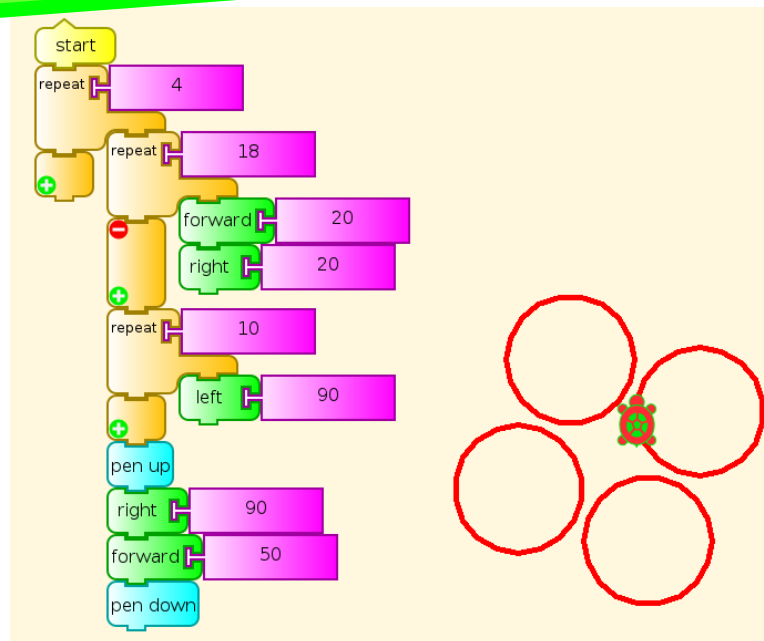

TURTLE 330 COOKTOP

TURTLE BLOCKS

TURTLE ART

LOGO

Note: This is not the best way to draw a circle. It is simply one way.

- What else can you draw on this cooktop (stove)?
- Can you make the circles more perfect (rounded)?

TURTLE 331 9 SIDED SHAPE

TURTLE BLOCKS

TURTLE ART

LOGO

A 9 sided shape is called a nonagon.

- Change this nonagon into an octagon.
- Now see if you can create a decagon.

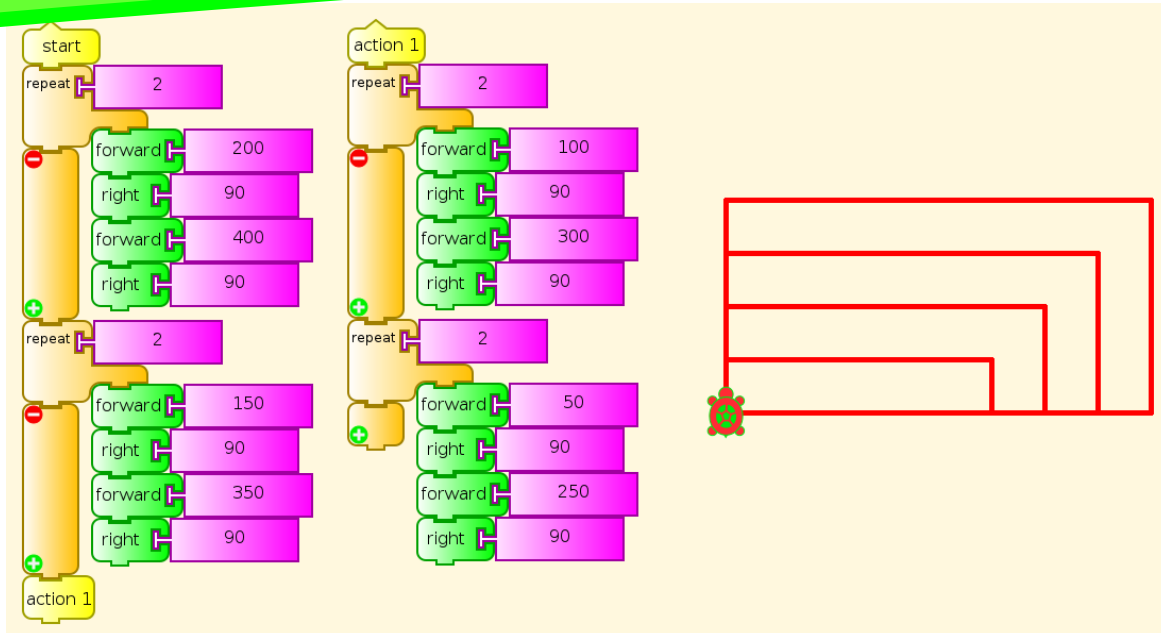

TURTLE 332 RECTANGLE PATTERN

TURTLE BLOCKS

TURTLE ART

LOGO

- Can you create this pattern with rectangles that are shorter than these ones?
- Can you add two larger rectangles to the pattern?
Have you kept the increase in size consistent with the originals?
